

# Index

The page numbers in **boldface** type indicate pages where the terms are defined. Terms that occur in investigations (*inv*) and activities (*act*) are also indicated.

## A

abiotic, **9**  
acceleration, **384**, *387act*, *402–403inv*  
  average, **394**  
  calculating, 396–397, 400  
  constant, **394**  
  direction of, 386, *388inv*  
  due to gravity, **399**, 400, *401inv*  
  effect on body, 386  
  of falling object, 389  
  and gravity, 398–399  
  human, 390  
  negative, 385  
  positive, 385  
  protecting against, 390, *392–393act*  
  uniform, *402–403inv*  
  visualizing, 404  
acid-base indicators. *See* pH indicators  
acid precipitation, 82, 237, 239  
acids, 220–232, **221**, *221act*  
  and carbonates, 239  
  chemical formulas, 225  
  in hair care products, 250  
  and metals, 238  
  naming, 226  
  in oceans, 232  
  pH levels, *241inv*  
  properties of, *229–231inv*  
adaptation, **18–19**. *See also* Animal adaptation; Plant adaptation  
adaptive radiation, **110**  
advection, 429  
aeration, **129**  
agriculture  
  alternative methods, 90  
  and climate change, 496  
  impact on biodiversity, 128  
  impact on soil, 129  
  land-clearing practices, 77, 82  
  and methane, 485  
  and nitrogen, 83, *88–89inv*, 486  
air bags, 280, 392  
air mass, **447**  
air resistance, 398–399  
albedo, **442–443**, *455inv*, 487  
alcohols, **247–248**  
algae, 64, 83  
alien species, 139  
alkali metals, 171  
alkaline earth metals, 171, 222  
alpha decay, **295**, *299act*  
alpha particle, **294**  
alpha radiation, 294–295, 298  
altitude, 445  
American bullfrogs, 142  
amphibians, 92–93  
Anahim Belt, 533  
aneroid barometer, 444

angle of incidence, **440**, 469, *477act*  
animal adaptation, 108–110  
  and fires, 120  
  predatory animals, 46, 50  
  prey animals, 46, 50  
  in specific biomes, 20–23, 25–28  
anions, 173  
antelope brush grassland, 2  
aqua regia, 238  
Arctic, climate change in, 462, 500  
asthenosphere, **520**  
atmosphere, *421act*, **436**  
  composition of, 437, 468  
  energy transfer in, 420, 436–457  
  layers of, 438–439  
  origin of Earth's, 436–437  
atmospheric pressure, **444–446**, *456act*  
atomic number, **171**  
atomic theory, 170  
  and bonding, 168–181  
atoms, **168–169**, *292act*  
axis of rotation, 469

## B

bacteria  
  blue-green, 79  
  denitrifying, **81**  
  nitrifying, **80**  
  nitrogen-fixing, **79**  
  and toxic waste, 136  
barometer, **444**, *457inv*  
Barry's Bog, *124act*  
bases, 220–232, **221**, *221act*  
  chemical formulas, 227  
  in hair care products, 250  
  properties of, *229–231inv*  
Becquerel, Henri, 288  
behavioural adaptation, **19**  
best-fit line  
  and acceleration, 394  
  and average velocity, *370act*  
  and motion, **351–352act**  
  and velocity, 394  
beta decay, **296**, *299act*  
beta particle, **296**  
beta radiation, 296, 298  
Big Bang theory, 424  
binary covalent compound, **194–195**  
bioaccumulation, **94**  
  of DDT, 96  
  effect on ecosystems, 92–102  
bioassay, 100  
biodegradation, **59**  
biodiversity, **4**  
  in Canada, *5act*  
  and nutrient cycles, 86–87  
biofilms, 136  
biofuels, 134  
biogeochemical cycles, 70

biogeoclimatic zone, **465**  
  British Columbia, *465act*  
biomagnification, **94**, 95, 96  
biomass, **57**  
biomes, 8–32, **9**  
  abiotic components, 9, 12–15, *29act*  
  biotic components, 9, *29act*  
  in Canada, 19, 491  
  and precipitation, 12–13  
  and temperature, 12–13  
  terrestrial, **10–11act**  
bioremediation, **99**  
Biosphere I, 68  
Biosphere II, 68  
biotic, **9**  
bisphenol-A, *331inv*  
blister rust, 141  
body waves, 529–530  
bogs, *122–124act*  
Bohr diagram, **174**, 176, 177, 178, *181act*  
Bohr models, *292act*  
Bohr, Niels, 174  
bonding pair, **177**  
boreal forests, 12, 21  
bromothymol blue, **224**  
brood parasitism, 43  
burrowing owl, 19

## C

cadmium, 97–98  
calcium metal, *165act*  
camas plant, 144  
CANDU reactor, 319, 320  
carbon, 244. *See also* Organic compounds  
  capture and storage, 496  
  movement through ecosystems, 73–76  
  stores of, 72–73  
carbon cycle, 71–76, *87act*, 473–474  
  effect of change, 86  
  and human activities, 77, 232  
carbon dating, 304  
carbon dioxide. *See also* Greenhouse gases  
  in the atmosphere, 77, 466–467, *473–474*, *483act*  
  emissions, *483act*, 485, *497act*  
  global warming potential, 484  
  in oceans, 232  
carbon footprint, *542act*  
carbon offset, 485  
carbon sink, **473**, 474, 487  
carbon source, **474**  
carbonate, **72**  
carnivores, **62**  
carpet burweed, 140  
Cascade Mountain Range, 418, 524  
Cascadia subduction zone, 524  
Cassini spacecraft, 316  
catalysts, **276–277**, *278–279inv*

- catalytic converters, 277  
catastrophic events, 475  
cations, 173  
caustic, 227  
cellular respiration, 74  
Celsius, Anders, 425  
CFCs. *See* Chlorofluorocarbons  
chain reactions, 318, 322*act*  
change in velocity, 382–383*act*, 397  
Chapman, Ross, 164  
chemical change, 165*act*, 168, 169*act*, 202  
chemical equations, 202, 202–214, 212*act*  
  balanced equation, 206  
  balancing, 207, 209–211  
  skeleton equation, 206  
  symbolic equation, 202  
  word equation, 202  
  writing, 208  
chemical names, 185*act*  
chemical pollutants, 94–102  
  migration of, 102  
  testing effect, 100–101*inv*  
chemical pollution  
  in Northern Canada, 102  
  reducing effects, 99  
chemical reactions, 202, 212–213*inv*, 313, 314  
  in baking, 256  
  classifying, 258–265  
  with magnesium, 330*act*  
  mass changes, 203*act*  
  rate of, 272–280, 278–279*inv*  
  types of, 256–270, 257*act*, 268–269*inv*  
Chinook (wind), 448  
chlorofluorocarbons (CFCs), 484, 486  
cichlid fish, 110  
climate, 16, 464  
  British Columbia, 464–465*act*  
  and catastrophic events, 475  
  and continental drift theory, 509  
climate change, 482, 498–499*act*, 543*inv*  
  and Arctic sea ice, 462, 500  
  in British Columbia, 492–493  
  in Canada, 490–491  
  effect on species, 87  
  and human activities, 482–500  
  impact on globe, 489–490  
  natural causes, 464–480  
  predictions, 494–495  
  response to, 494–495  
  response to, Canadian, 495  
  role of international cooperation, 489  
  role of science, 488  
climate models, 475, 492  
climatographs, 16–17, 30–31*inv*  
climax community, 114  
cloud chamber, 162  
coal deposits, 509  
Coast Mountains, 524  
coefficients, 203  
colour and albedo, 455*inv*  
Columbia Plateau, 533  
combustion, 264, 265  
commensalism, 40  
community, 39  
  biotic interactions, 39–43  
competition, 45, 140  
composite volcanoes, 532  
compounds, 168. *See also specific types of compounds, e.g., ionic compounds*  
  formation of, 176–177  
  formulas, 184–200  
  Lewis diagram of, 179–180  
  modelling, 181*act*  
  naming, 184–200, 185*act*  
computer models, 488  
concentration, 228, 275  
conduction, 428, 432*inv*  
  in the atmosphere, 440–443  
conservation of mass, 204–205, 207  
construction and climate change, 496  
consumers, 58  
contamination, 130  
continental drift, 506–515  
continental drift theory, 506–507*act*  
  evidence for, 508–509  
controlled burning, 134  
convection, 429–430  
  in the atmosphere, 447–448  
convection currents, 429, 433*inv*  
  in Earth's mantle, 520–521  
  in oceans, 471–473, 512  
convergent plate boundaries, 524–525  
converging plates, 524–525  
core, 519  
Coriolis effect, 449–450, 454, 472  
corrosive, 221  
counterfeit money, 300  
covalent bonding, 177  
covalent compounds, 185*act*, 193–195, 259  
  compared to ionic compounds, 196  
  naming, 194–195  
coyotes, 45  
Crater Lake, 480  
crust, 518–519*act*  
crystals, 242  
Cueva de los Cristales, 242  
Curie, Marie, 288–289  
cyanobacteria, 74, 79  
cyclones, 454  
*Cynognathus* fossils, 508
- D**  
Dalton, John, 169, 204  
daughter isotope, 307  
DDT, 96, 97, 331*inv*  
decay curve, 305  
deceleration, 385  
decomposers, 59  
decomposition, 56, 59, 75, 76, 260, 265, 268–269*inv*  
deforestation, 128, 485, 487  
denitrification, 81  
deserts, 17, 27  
detergents, 85  
detritivores, 61  
dew point, 446  
diatomic molecules, 180  
direction, 346, 386, 388*inv*  
disease, 140–141  
displacement, 348, 350*act*, 369  
distance, 346, 350*act*  
divergent plate boundaries, 523  
diverging plates, 523  
doldrums, 450  
double replacement, 262, 265, 268–269*inv*  
dragsters, 384  
drilling, deep ocean, 522  
drought, effect on ecosystem, 116  
drugs, illicit, 300  
dust, 32, 106
- E**  
Earth  
  characteristics affecting climate, 468–470  
  cross-section, 519, 520  
  effect of rotation on winds, 449–450  
  magnetic properties of, 511–512  
  earthquake-resistant buildings, 529  
  earthquakes, 510, 524, 526–531  
    British Columbia, 527  
    describing and classifying, 528  
    measuring, 530–531  
  East African Rift, 523  
  ecological footprint, 152, 152*act*  
  ecological pyramids, 63, 66  
  ecological succession, 111–114  
  ecology, 36  
  ecosphere, virtual, 39  
  ecosystems, 34–50, 36  
    abiotic components, 36  
    abiotic interactions, 37–38  
    bioaccumulation, 92–102  
    biodiversity, 48  
    biotic components, 36  
    biotic interactions, 39–47  
    energy flow, 56–66  
    human-related changes, 122–136  
    natural changes, 108–120  
    nutrient cycles, 68–90  
  ecotour operator, 146  
  Eden Project, 4–5  
  Einstein, Albert, 315  
  El Niño, 473, 478–479  
  El Niño–Southern Oscillation (ENSO), 473  
  electromagnetic radiation, 430  
  electronic products, ecological impact, 153*inv*  
  electrons, 170  
  element, 168  
  elevation, 15  
  endocrine disruptors, 96  
  energy availability, 65*act*  
  energy flow, 58  
    in ecosystems, 56–66  
  energy loss in ecosystems, 59–66  
  energy needs and climate change, 496  
  energy transfer in the atmosphere, 420,

436–457  
enhanced greenhouse effect, **484–486**  
environment, local, *35act*  
environmental issues in the media, *135inv*  
enzymes, *277*  
epicentre, **528**  
ethanol, *247, 248*  
Eurasian milfoil, *142*  
Eurasian Plate, *534*  
European starlings, *142*  
eutrophication, **82–83**  
exosphere, **439**  
exotic species, *139*  
explosions, *272*  
exponential decay, *310*  
extinction, **131**  
extreme weather, *452–454*

## F

Fahrenheit, Daniel Gabriel, *425*  
family (periodic table), **171**  
faults, **526**  
femtosecond laser, *168–169*  
Fermi, Enrico, *318*  
fertilizers, *82, 85, 90, 486*  
fire. See Forest fires; Grasslands  
fisheries and climate change, *490, 493*  
fission, nuclear, **313, 321**  
of uranium-235, *316–317*  
flatworms, *92*  
flooding, effect on ecosystem, *115*  
fluids, **429**  
focus (of earthquakes), **528**  
food chain, **60–62**  
pollutants in, *94–102*  
food preservation, *277*  
food pyramid, **63–64**  
food web, *62, 132*  
foreign species, **138**  
forest canopy, *19*  
forest fires  
adaptation to, *120*  
in carbon cycle, *76*  
controlled burning, *134*  
firefighters, *360*  
prescribed burning, *141*  
and secondary succession, *114*  
suppressing, *134*  
forest floor, *19*  
forestry  
effects of climate change, *491, 493*  
response to climate change, *496*  
forests, role in climate regulation, *487*  
formic acid, *228*  
fossils and continental drift theory, *508*  
frogs, malformations in, *92, 93*  
front (weather), **451–452**  
fuel bundles, *320*  
fuels  
alcohols, *248*  
biofuels, *134*  
fossil fuels, *72, 77, 82, 232, 485, 486*  
hydrocarbons, *246–247*  
for space rockets, *259*  
fusion, inertial confinement, *321*

fusion, nuclear, **320–321**  
as power source, *324*

## G

G-suit, *399*  
Galapagos finches, *110*  
Galileo Galilei, *398–399*  
gamma decay, *297, 299act*  
gamma radiation, *297, 298*  
Gandhi, Mahatma, *234*  
Garry Oak Ecosystem Recovery Team  
(GOERT), *143–144*  
garter snakes, *50*  
general circulation models (GCMs), **488**  
genetic diversity, *131*  
geologic structures and continental drift  
theory, *508*  
geologic uplift, **84**  
geothermal energy, *516*  
gigatonne, *69*  
glaciers, *466, 492, 493, 509*  
Global Positioning System (GPS), *345*  
global warming, **482–483, 498–499act**.  
*See also* Climate change  
global warming potential (GWP), **484**  
global wind systems, *450*  
*Glossopteris* fossils, *508*  
gondolas, *362–363*  
graphite, *272*  
grasslands, *24–25, 120, 134*  
gravity, **398–403**  
great blue herons, *44*  
greenhouse effect  
enhanced, **484–486**  
natural, **468, 476inv**  
greenhouse gases, *77, 468. See also*  
*specific gases, e.g., carbon dioxide*  
global emissions, *489*  
global warming potential, *484*  
sources of emissions, *494*  
ground water, *130, 136*  
group (periodic table), **171**  
electron arrangement, *175*  
Gulf Islands National Park Reserve, *144*  
gypsum, *242*  
gypsy moths, *144*

## H

habitat alteration, *141*  
habitat fragmentation, **126**  
habitat loss, **126–127**  
habitats, **36**  
half-life, **95, 304**  
halogens, *171*  
hazardous wastes, *320*  
health, human and climate change, *491*  
heat, *424–433, 427*  
heat transfer, *427–433inv*  
heavy metals, *97–98*  
Helm Glacier, *493*  
herbivores, **62**  
herbivory, *46*  
Hess, Harry, *512–513*  
Hickson, Catherine, *536*  
high pressure systems, *447*

Himalaya Mountains, *524*  
historical ecology, **34–35**  
HMS *Challenger*, **510**  
hookworms, *43*  
hot spot, **513, 533**  
human activities  
and carbon cycle, *77*  
and climate change, *482–500*  
and CO<sub>2</sub> emissions, *483act*  
and ecosystem change, *122–136*  
effect on atmosphere, *420*  
effect on biodiversity, *48*  
effect on nutrient cycles, *70, 90*  
effect on oceans, *232*  
and nitrogen cycle, *82, 88–89inv*  
and phosphorus cycle, *85–86*  
physics in, *411inv*  
and sustainability, *125*  
human decelerator, *390*  
humidity, **446**  
hurricanes, **454**  
hydrocarbons, **246–247**  
hydrogen ions, **228**  
hydroxide ions, **228**

## I

ice ages, *464, 466, 509*  
ice cores, **466–467**  
indigo carmine, **224**  
Industrial Revolution, *483act, 485*  
industry and climate change, *495, 496*  
infrared radiation, **430**  
inhibitors, *276*  
inner core, *519*  
inorganic, **244**  
inorganic compounds, *246*  
insect infestations, *117*  
insecticides, *96*  
insolation, **440–441**  
insulators, *428*  
Intergovernmental Panel on Climate  
Change (IPCC), **489**  
action plan, *495, 496*  
International Union of Pure and Applied  
Chemistry (IUPAC), *186*  
introduced species, **138–145. See also**  
Invasive species  
British Columbia, *142*  
and Garry oaks, *143–144*  
impact of, *139–142*  
Inuit and climate change, *500*  
invasive species, **139, 145act. See also**  
Introduced species  
ionic bonding, **176–177**  
ionic compounds, *185act, 186, 259. See*  
*also* Multivalent metals in compounds  
combining solutions of, *198–199inv*  
compared to covalent compounds, *196*  
formulas, *187, 188*  
naming, *186, 187*  
ions, **173**  
formation, *173, 174*  
Lewis diagram of, *179*  
models, *292act*  
production of, *228–229*

- iron, 270  
iron oxide, 191  
isopropyl alcohol, 248  
isotope analysis, 300  
isotope pairs, 307  
isotopes, 289–290
- J**  
Jansen, Martin, 267  
jet streams, 451  
jigsaw puzzle fit, 507  
Johnson, Michael, 348
